## Buffalo Public Library

### DAMAGE AND LOSS OF PUBLIC LIBRARY BOOKS

Injuries to books beyond reasonable wear, and all losses, must be made good by the borrower. If one volume of a set is lost or damaged, the borrower will be held responsible for the set, unless the Library can satisfactorily replace the lost volume.

Any person willfully injuring (cutting or marking) books or other property of the Library becomes liable under state law to imprisonment for a year, or a fine of five hundred dollars, or both.

No book with Library marks upon it is ever sold by the Library. If any book so marked is offered for sale and sold, both the seller and buyer are liable.

No person will be allowed to draw books until all fines and claims for damages are paid.

## ANNOUNCEMENT FOR 1876.

---

THE Publishers of the BUFFALO CITY DIRECTORY take pleasure in calling attention to the new features of the attractive volume they have produced for the Centennial year. Buffalo in its infancy and youth is contrasted with Buffalo in its early manhood. The map of New Amsterdam (Buffalo), made in 1804, and the map of Buffalo, made in 1828, are supplemented by an entirely new map of the city, showing all the recent railroad and other improvements.

As a reminiscence, the first Directory published in Buffalo, in 1828, is reproduced entire, in its matter and in its typography.

Accompanying the Directory are the following engravings: Buffalo Harbor, 1825; Buffalo, a View from the Top of the Old Buffalo Bank, 1829; City and County Hall, 1876.

The information in regard to the County and City Governments, and Public, Religious and Charitable Institutions, is more than usually full and accurate, and comprises a list of the Village and City Officers from 1816 to 1876.

The Business Directory will be found more complete than any of its predecessors.

The number of names in the Directory is 47,991, an increase over 1875 of TWO THOUSAND SEVEN HUNDRED AND SEVENTY-THREE. This fact demonstrates that Buffalo is steadily increasing in population, and should give encouragement to her citizens to persevere in efforts to add to her prosperity.

# LOCATION OF FIRE ALARM TELEGRAPH BOXES.

## EXPLANATION OF SIGNALS.

To announce an alarm from Signal Box No. 3, the gongs and bells will be struck three times. If from box 13, the gongs and bells will be struck once, and after a pause of five seconds will be struck three times. If from box 123, the gongs and bells will be struck once, and after a pause twice, and after another pause three times, thus 1-2-3. The number of the box will be repeated until a sufficient alarm is given.

**FIRST ALARM.** The number of the Box will be struck only.

**SECOND ALARM.** The number of the Box will be repeated, followed by ten consecutive blows.

**GENERAL ALARM.** Twenty blows will be struck.

# BANK NOTE REPORTER.

## A COMPLETE LIST OF COUNTERFEITS IN CIRCULATION IN THE U. S. JUNE 1, 1876.

Bankers, merchants and grocers will please note the following lists, as furnished by the Redemption Agency at Washington, D. C.

### UNITED STATES.

\$500. Adams' portrait flat; buttons on coat imperfect; the ear of J. Q. Adams blurred and indistinct.

\$100. First issue, spread eagle wings resemble a bat's; in small figures on back the cyphers run to the centre of note; genuine cyphers run toward both ends; figures are too wide apart; ink bad.

\$50. First issue, picture of Hamilton; the ink is bad on the number; buttons on coat are indistinct; counters are flat; on the left hand corner on back the fifties run together.

\$20. Second issue, the general appearance of the note is darker than the genuine; the color of the ink on the number is dark blue; genuine light blue, and they fall on silk tissue in the paper. Dangerous.

\$20. Geometrical lathe work is very bad; the two counters are not exactly the same size; on genuine they will be both alike.

\$10. Lincoln on left hand is very flat; ought to stand out prominent, as though you could pass behind it; ink bad.

\$5. The words United States look as though shaded with a lead pencil; ink bad.

\$2. Portrait of Hamilton very unlike genuine; ink on number very bad.

\$1. Picture of Chase very poorly executed.

## STREET AND AVENUE DIRECTORY.

### EXPLANATION.

It will be noticed that in this Street Directory the names of the streets are set down in alphabetical order, giving the course which they run, according, as near as possible, to the points of the compass, and enumerating all streets which cross the same in the order in which they occur. The number on one corner has been given, so that a person wishing to find, say, 435 MAIN STREET, on consulting the Street Directory, finds that the right-hand corner of Main and Mohawk is No. 437, consequently the place he seeks is only a few doors above.

# BUFFALO.

---

In presenting our Directory in this Centennial Year, a few facts relating to the history of our city and county, may not be out of place.

In the year 1772 the Assembly of the Province of New York organized the county of Tryon, which included all the territory in the Province westward of the county and city of Albany.

In 1784 the Legislature of the State of New York changed the name of the county of Tryon to Montgomery. In 1789 all the territory in the county of Montgomery lying westward of what is now Syracuse, was organized into the county of Ontario. In 1802 the county of Genesee was set off from Ontario. In 1808 the county of Niagara was created from Genesee, and in April, 1821, all that part of Niagara lying south of Tonawanda Creek was organized into the present county of Erie.

Of the geographical importance and natural advantages of the site on which Buffalo now stands, a French officer makes mention in a narrative of his adventures, while on an expedition against the Iroquois Indians, nearly two hundred years ago.

The writer of a historical sketch published in the Buffalo City Directory of 1847, says :

"The earliest notice of the present site of Buffalo may be found in the travels of Baron La Houtan. He ascended the Niagara into Lake Erie on the fifteenth day of August, 1687, more than a hundred years prior to the first settlement of our city. He advised the French government to build a fort at this place, which in anticipation of its construction, he calls by the name of Fort Suppose on the map accompanying his travels. This fort was intended as a check against the neighboring Iroquois and Senecas."

Says William Ketchum in his "History of Buffalo" : "From the close of 1782-3, to the time of the delivery of the forts on the northern frontier in 1796, British authority extended and was supreme here, and several officers, agents and traders were constantly and permanently located here."

"Cornelius Winney had a trading house at 'The Lake,' as it was called (now *Hamburgh Canal*), in rear of the present site of the *Mansion House*, nearly at the junction of *Washington* and *Quay* streets."

"This was the first building erected by civilized man in *Buffalo*, and *Cornelius Winney*, may, therefore, be considered the first white resident of *Buffalo*."

"He probably came to reside here in about 1783-4, and remained until after the surrender of *Fort Niagara* to the Americans in 1796."

*La Rochefoucault Liancourt*, a French nobleman, speaks of visiting *Buffalo Creek* in 1795, and says: "At the post on *Lake Erie* there was a small collection of four or five houses."

On the map of the *Holland Land Company's Purchase*, drawn in 1800, the present site of *Buffalo* is designated as *New Amsterdam*. The village, however, was not laid out and the survey completed until 1804.

The original agreement, as drawn between the contracting parties to the sale of the first lot disposed of in *New Amsterdam*, begins as follows:

"ARTICLES OF AGREEMENT.—Indented, Made, Concluded, and Fully agreed upon, this First day of August, in the year of our Lord one thousand eight hundred and four, Between *William Willink*, *Pieter Van Eeghen*, *Hendrick Vollenhoven*, *Rutger Jan Schimmelpennick*, *William Willink*, the Younger, *Jan Willink*, the Younger, Son of *Jan*, *Jan Gabriel Van Staphorst*, *Cornelius Vollenhoven* and *Hendrick Seye*, all of the City of *Amsterdam*, in the Republic of *Batavia*, by *Joseph Ellicott*, their attorney, of the first part," etc.

These members of the *Holland Land Company*, being natives and residents of the *Netherlands*, will account for the quaint names by which many of the streets of *Buffalo* were originally designated.

For instance, *Main street*, below *Niagara street*, was called *Willink avenue*; above *Niagara street*, *Van Staphorst avenue*; *Erie street*, *Vollenhoven avenue*; *Niagara street*, *Schimmelpennick avenue*, etc. (See map at the head of this sketch.) Most of these names were retained until 1826-7, when the boundaries of the corporation were extended, and the names as shown by the map of the *Directory* of 1828, were substituted.

The original plan of *New Amsterdam*, as designed and laid out by *Joseph Ellicott*, in 1804, is practically, as far as it then extended, the same as that of *Buffalo* of to-day. As an item of interest bearing on the laying out of *New Amsterdam*, we quote from *Mr. William P. Letchworth's "Life of Samuel F. Pratt and the Pratt Family."* He says, "When the *Holland Land Company* had received the title to the site of *Buffalo*, their agent wrote to the Dutch Minister at *Washington*, to select some person competent to lay out their lands for them. He was referred to *Andrew Ellicott*, first Surveyor General of the United States, a brother of *Joseph Ellicott*, who had

been assisting George Washington in the laying out of the National Capital. Andrew Ellicott told the Dutch Minister that he had a brother whom he could recommend for the place, if they could make a bargain. A bargain was made, and thus Joseph Ellicott came to lay out the city of Buffalo, and held the important position of agent of that famous land corporation, an office ever faithfully filled by him."

"From this circumstance may be attributed a similarity in some respects in style in the plans of Washington and Buffalo."

"The original names of very many of the streets have been changed from three-ply, double and twisted unpronounceables to more simple modern ones."

The first village lot sold in New Amsterdam, as shown by the original articles of agreement, and original ledger of Joseph Ellicott (all now in possession of the Buffalo Historical Society), was on August 1, 1804. This was designated as lot 35, and was located on the northwest corner of Wilk avenue and Seneca street, running through to Cayuga street, or what is now Pearl street. This lot contained a half acre, and was sold to Sylvanus Mabee for \$135.

In 1807, it is said, Buffalo, or New Amsterdam, contained about a dozen houses.

"In 1811," says Judge Townsend, "Buffalo contained less than one hundred dwellings, and a population of some four or five hundred. The only public buildings were the old stone jail on Washington street, and an unfinished wooden court house. A small wooden building put up for a school-house, served also for a town hall, a church for all religious denominations, and, indeed, for all public purposes. Three taverns were kept, one by Mr. Landon, occupying a part of the site of the Mansion House, another of more moderate pretensions, at the corner of Main and Seneca streets, and a third near the corner of Main and Court streets. The only merchants were Juba Storrs & Co., Grosvenor & Heacock, Eli Hart and Isaac Daves, the first being located on the corner of Washington and Exchange streets, and the others on Main between South Division and Exchange streets. A mail from Albany, brought once or twice a week, in a wooden-spring lumber wagon, was opened by Oliver Forward, a justice of the peace. Judge Granger held the office of Postmaster, and also that of Collector of the Port; the latter an office rather of honor than of business profit. The commerce of the Lakes was small. I think there were only four or five small vessels on our side, and two or three merchantmen, besides two British armed vessels, on the other. There was no harbor here. The mouth of Buffalo Creek was usually so much obstructed by a sand-bar, that small vessels could but rarely enter, and even canoes were sometimes shut out, and foot-men walked dry shod across the mouth. Vessels were loaded and unloaded at a wharf near Bird Island, at Black Rock."

April 2, 1813, the Legislature passed an act incorporating the village under the name of Buffalo. December 30, 1813, Buffalo was burned by a force of British and Indians, who crossed at Black Rock. Only two houses were left standing. No organization was had under the village charter granted by the Legislature in April, 1813. In April, 1816, the Legislature passed another act of Incorporation, naming Oliver Forward, Charles Townsend, Heman B. Potter, Ebenezer Walden, Jonas Harrison and Samuel Wilkeson, trustees. On May 6, 1816, these trustees met and organized, appointing the village officers.

Mr. Sheldon Ball in his pamphlet issued in 1825, tells us that the village of Buffalo then contained between four and five hundred buildings, and states that, according to the village census taken in January, 1825, the number of inhabitants was 2,412.

According to the census reports the population of Buffalo has been as follows:

In 1825.....	2,412	In 1850.....	43,300
In 1830.....	8,668	In 1855.....	74,300
In 1835.....	15,661	In 1860.....	81,130
In 1840.....	18,213	In 1865.....	94,210
In 1845.....	29,773	In 1870.....	117,575

In 1875, the State Census was shown by many tests to have been very imperfectly taken, indicating a population of about 135,000, whereas a careful and correct enumeration would undoubtedly have shown over 160,000 inhabitants.

Buffalo was incorporated as a city in 1832. The city was then divided into five wards; each ward being entitled to two aldermen. The mayor was elected by the aldermen, for one year, and was their presiding officer. The salary of the mayor was \$250 per annum. The aldermen received no pay.

The first church established in Buffalo, was by the Methodists in 1809. It was organized under the direction of the Rev. James Mitchell.

The first newspaper, "The Buffalo Gazette" (a weekly), was issued October 3, 1811. S. H. & H. A. Salisbury, publishers and proprietors.

The first steamboat on Lake Erie, the "Walk-in-the-Water," was built at Black Rock, in 1818.

The first railroad terminating in this city—The Attica and Buffalo Railroad—was opened for travel on the eighth day of January, 1843.

The Erie Canal, which has accomplished so much for the prosperity of our city, was completed in 1825.

The first fire company in Buffalo—Cataract No. 1—was organized in the year 1824. Ebenezer Johnson, foreman.

The first grain elevator in Buffalo, was built by Joseph Dart, in the year 1843.

The establishment of the Public Park in the city, was effected by an act of the Legislature, passed April 14, 1869.

The Park grounds, selected by the Park Commissioners, cover in the aggregate 598 $\frac{3}{8}$  acres.

The present system of Water Works, by which water is obtained through a tunnel extended to the center of the Niagara River, has cost the city, up to January 1 of this year, \$2,771,464.12.

The number of miles of water mains laid in the city, at the date above named, was 91 $\frac{1}{2}$  miles.

The number of miles of paved streets, is 86 $\frac{1}{8}$ ; of unpaved streets, is 238 $\frac{1}{8}$  miles.

The number of public street lamps, is 3,974. These furnish light for about ninety (90) miles of streets.

The system of sewerage, according to the last report of the City Engineer, extends over 85 $\frac{4}{8}$  miles.

The vessels owned in the "District of Buffalo Creek," as shown by the U. S. Government Report for the year ending June 30, 1875, was 772, aggregating a tonnage of 162,657 tons.

The total receipts of grain and flour (the latter reduced to bushels), for the Port of Buffalo for the year 1875, was 56,786,323 bushels.

The new City and County Hall, one of the finest public buildings in the country, containing nearly all the city and county offices, was completed this year, at the total cost of about \$1,400,000.

The total assessed valuation of the taxable property of the city of Buffalo for the year 1876, is—real, \$102,540,095.00; personal, \$9,155,860.00.

For interesting statistics, showing the trade and commerce of Buffalo, and for matters in detail relating to benevolent, literary and social Societies and Associations, Asylums, Hospitals, Churches, Cemeteries, Libraries, Colleges, Academies, Public and Private Schools, Banks, Newspapers, Elevators, Railroads, Telegraphs, Public Buildings, Halls and Hotels, Police, etc., see under their appropriate heads, as published elsewhere in this Directory.

The city of Buffalo, on account of its desirable position in respect to railroad and water communication, its admirable summer climate, its exceedingly favorable exhibit in its vital statistics of health and longevity, its attractions of lake, river, parks, and beautiful residences, its public and private libraries, art galleries, churches, scientific and literary associations, furnishes one of the most favorable locations for business enterprise, and one of the most charming places for homes, both for the capitalist and the artisan, that is to be found on this continent. Its place as the principal grain market of the world, as the leading city in the cattle trade, in this country, and its many flourishing manufactories, give proof of the substantial character of its growth, and the absolute certainty of its future increase and prosperity.

We append a list of village and city officers for each year, from the organization of the village in 1816 to the present time.

SEEN FROM THE TOP OF THE OLD BUFFALO BANK IN THE YEAR 1829.

## EARLY HISTORY OF THE PUBLIC SCHOOLS.

---

THE history of the Public Schools of Buffalo dates back to the year 1806. Previous to the year 1832, at which time the village of Buffalo was created a city by the act of the Legislature, all the schools were known as District Schools of the town of Buffalo. The territory constituting the town embraced all that territory since known as Black Rock, and, until about 1830, extended to and included Tonawanda. The village of Buffalo at that time constituted the first school-district of the town, and was designated as District No. 1. The first school-house was erected in 1806, by gratuitous labor and material contributed by the early settlers. The school-house was located on the north-west corner of Cayuga (now Pearl) and Swan streets. The name of the first teacher was Samuel Whiting, a Presbyterian minister. The second teacher's name was Amos Callender. This school continued to flourish until December, 1813, when it was burned by the British.

After the war the school was re-organized and kept in such rooms as could be obtained, and Mr. Callender continued as teacher. He was succeeded by a Mr. Pease. During the time intervening from the close of the war to 1820, several schools were established and kept in rooms and private houses. Among the teachers were Millard Fillmore, then a law student, Henry Lovejoy and Wyatt Camp.

When the city organization of schools took effect, in 1838, there were six district school-houses in the city, numbered under the old town organization respectively, Nos. 2, 13, 15, 16, 17 and 19.

No. 2 was organized about 1821, and in the year following a lot was purchased, and a building erected, on the corner of Pearl and Mohawk streets; Mr. Peter E. Miles was the first teacher. This school-house was occupied until about 1833, when it was abandoned, and the brick school-house erected on Franklin street (alley), between Huron and Mohawk streets. About the same time the district was again divided, and a district formed, known as No. 3, located at Cold Spring.

District No. 13 was organized in 1830, and a small school-house was erected on the corner of Pollard (now Jefferson) and Folsom streets, where the school was kept until the new school-house was built on Seneca street in 1839. The first school was taught for a short time by a female teacher, who was succeeded by Aaron Bean.

District No. 15 was organized in 1831, and a two-story school-house was erected in the year following, on a lot presented by Dr. B. Burwell and Dr. J. W. Clark, located on Perry street. The first teacher was Harry Griswold.

District No. 16 was organized about the same time as No. 15, and a small brick house erected on the corner of Goodell and Washington streets. Nothing authentic is known concerning the first teachers of this school.

District No. 17 was organized about the same time as the preceding. A school-house was erected on South Division street in 1834 or '35, on a part of the lot now occupied by Public School No. 7. It was then considered the best built house in the city for school purposes. It was used until 1845, when it gave place to the present structure. One of the first teachers who taught in this school was Benjamin Knowlton, father of Charles B. Knowlton who is now connected with the schools.

District No. 19 was organized about 1834, and in the year following a school-house was erected on Louisiana street, on a lot given the district by Dr. J. W. Clark. The first teacher was Stephen Carner. This house was carried away by a flood the same year it was built. It was immediately replaced, and a school continued in it until the erection of Public School-house No. 4.

In 1835 and '36, an unusual interest was awakened in the cause of education, but the financial reverses of the following year interfered with the execution of any well devised plan.

However, during the winter of 1836-7, a law was passed creating the office of Superintendent of Public Schools. Under this law, during the following summer, R. W. Haskins was appointed Superintendent, but without any salary. After a few weeks he resigned, on account of the imperfections of the law, retaining, as it did, the trustees under the old system which necessarily left nothing for the Superintendent to do. Upon the resignation of Mr. Haskins, Mr. Oliver G. Steele, who had labored strenuously for a reform, and who has ever since rendered incalculable aid in the promotion of general education, was appointed, and, at the urgent solicitation of Hon. N. K. Hall, then Alderman and Chairman of the School Committee, finally accepted the office. Mr. Steele entered upon his duties in earnest, and began immediately a work which resulted in the organization of a new school system. The public became deeply interested in the subject, and a call was made for a public meeting, to be held on the evening of the thirty-first of August, 1838, at the old Court House, to consider the feasibility of petitioning the Legislature to change the law, and to incorporate a free school system. The meeting was adjourned to the fourteenth of September, at which time a committee of four for each ward was appointed "To inquire into the condition of the schools in Buffalo, both public and private, ascertain the number of children who attend school, expense of their education, and report the same, together with some plan for the improvement of

our schools, at a future meeting to be called for that purpose." The committee consisted of the following: Dr. J. Trowbridge, Charles S. Pierce, F. W. Atkins, A. C. Moore, J. R. Price, J. W. Beals, S. S. Case, Lucius Storrs, Jas. J. Brown, N. H. Gardner, Henry Root, M. Bristol, S. N. Callender, H. Shumway, LeGrand Marvin, O. G. Steele, N. Lyman, N. Wilgus, M. Baker, D. Galusha, N. K. Hall, N. Vosburg, S. Chamberlain, James Miller and S. Caldwell.

At a meeting held at the Common Council Chamber, on the nineteenth of September following, the committee unanimously "recommended the adoption of the Free School System."

In the winter following, the Legislature enacted the first School Law applicable to the city of Buffalo. This law was drafted by Judge Hall and Superintendent Steele, and embraced substantially the present system.

On the thirty-first of January, 1839, Mr. Steele submitted the following, which constitutes the first Annual Report ever transmitted to the Common Council of Buffalo by a Superintendent of Public Schools:

IN COMMON COUNCIL, JANUARY 31, 1839.

ANNUAL REPORT OF THE SUPERINTENDENT OF COMMON SCHOOLS, FOR THE YEAR 1838.  
ACCEPTED AND ORDERED PRINTED,

T. C. PETERS, Clerk.

To the Honorable the Common Council of the City of Buffalo:

In pursuance of the requirements of the City Charter, I herewith submit the following report:

The number of public schools in the spring of 1838, and to whom was apportioned the public money for that year, was *seven*. The numbering being according to the organization of the districts made by former school commissioners, for the town of Buffalo. The amount of public money distributed was \$2,377.77, which was apportioned to them as follows:

District No. 2, House on Franklin st.,.....	\$419.21	District No. 17, House on S. Division st.,...	472.12
District No. 13, House at the Hydraulics,...	174.90	District No. 19, House on Louisiana st.,.....	161.82
District No. 15, House on Perry st.,.....	344.82	District No. 20, House on Genesee st.,.....	428.17
District No. 16, House on Goodell st.,.....	367.93		
			\$2,377.77

On the twenty-fourth of May last a new organization of the city into Districts was reported to the Common Council by the Committee on Common Schools, which was unanimously adopted.

This arrangement divides the city into *fifteen* Districts, which are believed to be as equally divided as convenience will allow. A map of this division is on file in the office of the City Clerk. The schools now in operation, according to this organization, are as follows:

District No. 3, House on Perry street,.....	W. ROBINSON, Teacher.
District No. 4, House on Louisiana street,.....	STEPHEN CARSKER, Teacher.
District No. 5, House at Hydraulics,.....	F. W. PARKER, Teacher.
District No. 6, House on North Division street,.....	S. S. COOK, Teacher.
District No. 7, House on South Division street,.....	O. R. POTTER, Teacher.
District No. 8, House on Church street,.....	K. S. HAWLEY, Teacher.
District No. 10, House on Franklin street,.....	AARON BEAN, Teacher.
District No. 13, House on Genesee street,.....	H. R. PARSONS, Teacher.
District No. 15, House on Goodell street,.....	D. GALUSHA, Teacher.

All the Districts above mentioned have school-houses and lots, except Nos. 6 and 13. In No. 11 a very eligible lot was purchased during the last year, and it is the intention of the inhabitants of the district to erect a suitable house during the ensuing summer.

The inhabitants of Districts Nos. 2, 5, 6 and 13, are also about taking the necessary steps to provide suitable school lots and houses for their several districts.

During the last year a large and commodious school-house has been erected in district No. 8, which is now nearly ready for occupation. The building is of brick, built in the most substantial manner—two stories with a high basement, and will accommodate rising 300 scholars. It is intended in this building to teach all the branches of education (except the classics) which are taught in the best schools and academies, commencing with the rudiments. By a proper division of the scholars, by studies, and a sufficient number of capable assistant teachers, it is confidently believed that the objects intended will be fully accomplished.

In districts Nos. 3, 4, 7 and 15, taxes have been levied and their lots and buildings have been put in complete repair. All the other houses are in good repair, with the exception of that in No. 5, which is not worth repairing.

The branches of education taught in the public schools are spelling, reading, writing, arithmetic, grammar, history, geography, and, in some cases, book-keeping, natural philosophy and chemistry.

The books most in use are Cobb's Spelling Book, Cobb's Juvenile Readers, Nos. 1, 2 and 3, English Reader, Hale's History, Davis' Arithmetic, Olney's and Huntington's Geography, Smith's and Kirkham's Grammar, Comstock's Philosophy and Chemistry, and Preston's Book-keeping. It is intended hereafter that the books used shall be uniform in all the public schools.

The census in the several districts will be found in the accompanying documents numbered with the number of the district reported, and all the information required by law, to be reported to the State Superintendent of Common Schools, will be found condensed in the schedule marked A. It has been found necessary, for the present, to annex such districts as are destitute of school-houses to those which are provided, which will account for the disproportion of the number of children reported in some of the districts.

It is gratifying to be able to state that the character of the public schools has for the last year been constantly improving, and that they are in consequence rapidly gaining ground in public estimation. The great increase in the number of scholars will be shown by the following table:

Number of scholars entering on the 1st day of the 1st term in 1898.		Number of scholars entering on the 1st day of the 1st term in 1899.	
District No. 3, Perry street, .....	51	District No. 3, Perry street, .....	121
District No. 4, Louisiana street, .....	20	District No. 4, Louisiana street, .....	36
District No. 5, Hydraults, .....	15	District No. 5, Hydraults, .....	42
District No. 7, South Division street, .....	9	District No. 7, South Division street, .....	63
District No. 10, Franklin street, .....	52	District No. 10, Franklin street, .....	79
District No. 13, Genesee street, .....	11	District No. 13, Genesee street, .....	32
District No. 15, Goodell street, .....	30	District No. 15, Goodell street, .....	58
	179		431

By this it appears that the attendance at the public schools has increased during the last year nearly three-fold. In addition to which two additional schools were in operation. Many of the school-houses are much too small to contain the number of children applying for admission, and applications are almost daily rejected on that account. This fact shows the importance and necessity of each district providing itself with a suitable school-house as rapidly as possible.

The price of tuition for the past year was fixed at \$2.00 per quarter for the winter term, and \$1.50 for the summer term. A very large portion of the tuition is, however, found to be uncollectible, and it is also found that the trifling sum charged prevents a large number of the poorer class of our citizens from availing themselves of the advantages which they ought to derive from the public schools. The Free School System, under the control and direction of the Common Council, is now generally conceded to be the only one which can be made popular and efficient. It has been adopted in most of the large cities in the Union, with the most signal success, and there is probably no city in the Union where a liberal and well digested system of Free Public Schools is more needed, or would be productive of more general good, than in Buffalo. Should the system now proposed by the Common Council be adopted this season, I feel confident

that the next Annual Report will show a far greater improvement and increase in the Public Schools than any which has preceded it.

I would recommend that public examinations of the schools be held at stated periods, which shall be attended by the Common Council, or the Committee on Common Schools, and a suitable number of medals, or prizes of some sort, be distributed to such of the scholars as are deserving of reward. This plan will have a tendency to bring out a spirit of honorable competition which cannot fail of producing a good effect.

During the last year a Teacher's Association has been formed in the city, composed of all the public, and a number of the private, school teachers who hold weekly meetings for mutual improvement in the science of teaching. This has already been productive of much good, and if continued, as it doubtless will be, must inevitably elevate and improve the intellectual character of the teachers as well as the schools under their charge.

Respectfully submitted,

O. G. STEELE,

Superintendent of Common Schools.

It is very evident that the enumeration, as shown above, must have greatly underrated the number of inhabitants.

According to the United States Census of 1870, Buffalo had a population of 117,714. The City Directory of that year contained 28,500 names. Since then, under the same general system of canvassing, the Directories of each year have shown a steady increase. The number of names in the Directory of 1875 was 45,158, a gain in five years of 16,658 names. Now, allowing only  $3\frac{1}{2}$  persons to a name in the Directory (the usual ratio is  $4\frac{1}{2}$ , which the United States Government Census of 1870 verified), it would indicate an increase from 1870 to 1875 of 58,303 inhabitants, or 42,273 more than shown by the State enumeration.

## BUFFALO COMMERCE, PAST AND PRESENT.

A SKETCH BY WILLIAM THURSTONE.

THE great commercial advantages of Buffalo are well known, arising from its favorable position with the numerous points from which are drawn its receipts, and the ready means at its disposal for their distribution by lake, canal and railroads; added to which are the benefits resulting from cheap fuel, rapid mode of transfer of grain, coal, salt, etc., ample storage facilities, extensive dockage, and all kinds of manufacturing and mechanical enterprise. Its healthy climate, handsome streets, magnificent park and fine public buildings render Buffalo a pleasant place of residence for the capitalist as well as the laborer.

The growth of the flour and grain commerce of Buffalo is shown by the following exhibit of the receipts by lake: In 1836 there were received 139,178 barrels of flour, and 543,461 bushels of grain of all kinds; whilst in 1875 the figures were 1,810,402 barrels of flour and 65,194,716 bushels of grain. The comparisons by decades are interesting, as marking the progress of the movement:

Year.	Flour, bbls.	Grain, bushels.	Grain, including flour reduced to grain, bushels.
1836 .....	139,178	543,461	1,239,351
1846 .....	1,374,529	6,491,522	13,366,167
1856 .....	1,126,048	20,123,667	25,753,967
1866 .....	1,313,543	51,820,342	58,388,037
1875 .....	1,810,402	65,194,716	74,246,726

The aggregate receipts of flour and grain (reducing flour to grain) for the ten years ending 1845, inclusive, were 41,851,483 bushels; for the ten years ending 1855 were 174,717,437 bushels; for same period, 1865, 432,390,318 bushels; and from 1866 to 1875 were 597,121,670 bushels, making a grand total of 1,246,080,098 bushels in forty years! In addition to the foregoing figures, there were the large receipts by the Lake Shore & Michigan Southern Railroad (which have averaged 25,000,000 bushels annually for several years past), and also from the other railroads centering at this point of which no record was furnished.

It is stated that in 1838 the first cargo of wheat or grain of any description brought to this port, from Chicago, for sale, changed hands on the market. Mr. Giles Williams was the shipper and the seller; the buyer's name was not recorded.

The transfer of grain cargoes from vessels into storehouses and canal-boats, prior to 1843, was done by manual labor, being raised from the hold in tubs or bags. In that year, Mr. Joseph Dart erected the first elevator ever built for storing and transferring grain, with a storage capacity of 55,000 bushels and a transfer capacity of 15,000 bushels per day, near the mouth of Buffalo Creek. So successful was this innovation that many other elevators were afterwards constructed. In 1856 the storage capacity had increased to 2,215,000 bushels, and in 1863 to 5,885,000 bushels; while there are now twenty-eight elevators at this port, with the estimated capacity of storing 6,500,000 bushels and transferring 2,500,000 bushels per day. The nominal value of these elevators is stated to be \$4,500,000, and their cost was from \$35,000 to \$500,000 each. Five of the elevators have machinery attached, whereby 50,000 bushels of wet or damaged grain can be dried every twenty-four hours.

The tonnage of vessels belonging to the customs district of Buffalo Creek is the largest on the northern lakes, and fourth in the United States. From official documents, made up to June 30, 1875, it comprised 772 crafts, viz.: Seventeen barges, 102 sail vessels, 123 steam vessels, and 530 canal-boats, with an aggregate of 162,656.67 tonnage. In 1852 the total tonnage was only 56,523.

No less than 6,278 lake vessels of all kinds entered and cleared at this port in 1875, aggregating 3,259,839 tonnage.

Great improvements were projected and made during the last twenty-five years for facilitating the movement of our marine commerce by the erection of lighthouses, the construction of piers, harbors and breakwaters, deepening the river, etc. The introduction of the Storm Signal Service, a few years since, has worked greatly to the advantage of the vessel interest.

The first American vessel reported built on Lake Erie was constructed at Four Mile Creek, near Erie, Pa., in 1797, and was called the "Washington." In 1843 it is said that the first freight propeller was built and named the "Hercules;" in 1854, the number had increased to ninety-seven. In 1870, the novel feature was introduced, successfully, of using steam barges for carrying grain, and capable of towing two or three large vessels as consorts; this mode had been adopted advantageously before with lumber craft.

The Erie Canal, from 1826 to 1856, was the only route for commerce between the seaboard and the Western and North-western States. Its construction was authorized in 1817, and the canal was completed in 1835 with a prism four feet deep, forty feet wide at surface and twenty-eight feet on bottom. In 1835 the enlargement was commenced, and completed in 1862, giving a prism seven feet in depth, seventy feet width at surface and fifty-six feet at bottom. A system of double locks was recommended some years since and their building was completed last year.

The average burthen of boats in 1825 was seventy tons; in 1862, and since, 210 tons; the maximum for several years, 240 tons, and the length of boat ninety-six feet. Three systems are in use for moving boats, viz.: horse or mule power, steam, and the Belgian system of cable towing, from Buffalo to Lockport.

The length of the Erie Canal, from Buffalo to Troy, is 345 miles; to Albany, 352 miles. The total number of locks is seventy-one, viz.: twenty-one to Syracuse and fifty from Syracuse to Albany. When canal-boats reach tide-water, they are made up into tows of forty to fifty boats and taken to New York, a distance of 150 miles, by a powerful steam tug, the trip being made in about forty hours.

During the past twenty-five years the number of days on which the canal was opened for navigation each year averaged 220.

The tolls collected at Buffalo in 1857 amounted to \$198,470; from 1864 to 1875, inclusive, the average per annum was \$1,615,000.

The movement of freight of all kinds, by canal, from Buffalo eastward, averaged for the past twelve years 1,460,000 tons per annum, of the value of \$55,900,000. The average annual receipts from the East were 600,000 tons for the same period.

The total cost of construction, with interest added, of all the canals of this State, to September 30, 1874, was \$188,364,445.12.

The total movement of all kinds of property on all the canals of this State, in 1836, was 1,310,807 tons; in 1872, 6,673,370 tons, and in 1874, 5,804,588 tons.

The increase in the lumber trade of this port may be realized by comparing the principal receipts of 1851 with the average of the years 1873 to 1875, inclusive. In 1851 there were received 84,000,000 feet of lumber, 1,500,000 lath, 11,000,000 staves and 13,000,000 shingles. The average of 1873 to 1875 was 28,000,000 hoops, 200,000,000 feet of lumber, 8,000,000 lath, 26,000,000 staves, 50,000,000 shingles and 43,000 bundles of shooks.

The coal trade of Buffalo has also become a marked feature from its enormous increase. In 1852 only 57,559 tons of all kinds were received, while in 1875 no less than 1,177,973 tons of anthracite, bituminous and semi-bituminous came to hand. In 1861 it was with great difficulty that 25,000 tons of anthracite were disposed of.

The growth of the live stock trade of Buffalo has been steady, and this interest has attained very great prominence. The earliest figures at hand are those of 1852, when the receipts of cattle, sheep and hogs aggregated for that year only 221,338 head. Fifteen years later, in 1867, the number received had increased to 1,105,255 head. In 1875 the total was 2,421,830 head, divided thus: 513,530 cattle, 1,067,300 hogs, 841,000 sheep; and the estimated value thereof was \$55,000,000.

In 1853 the banking capital of this city was \$1,475,000; now it exceeds \$5,000,000.

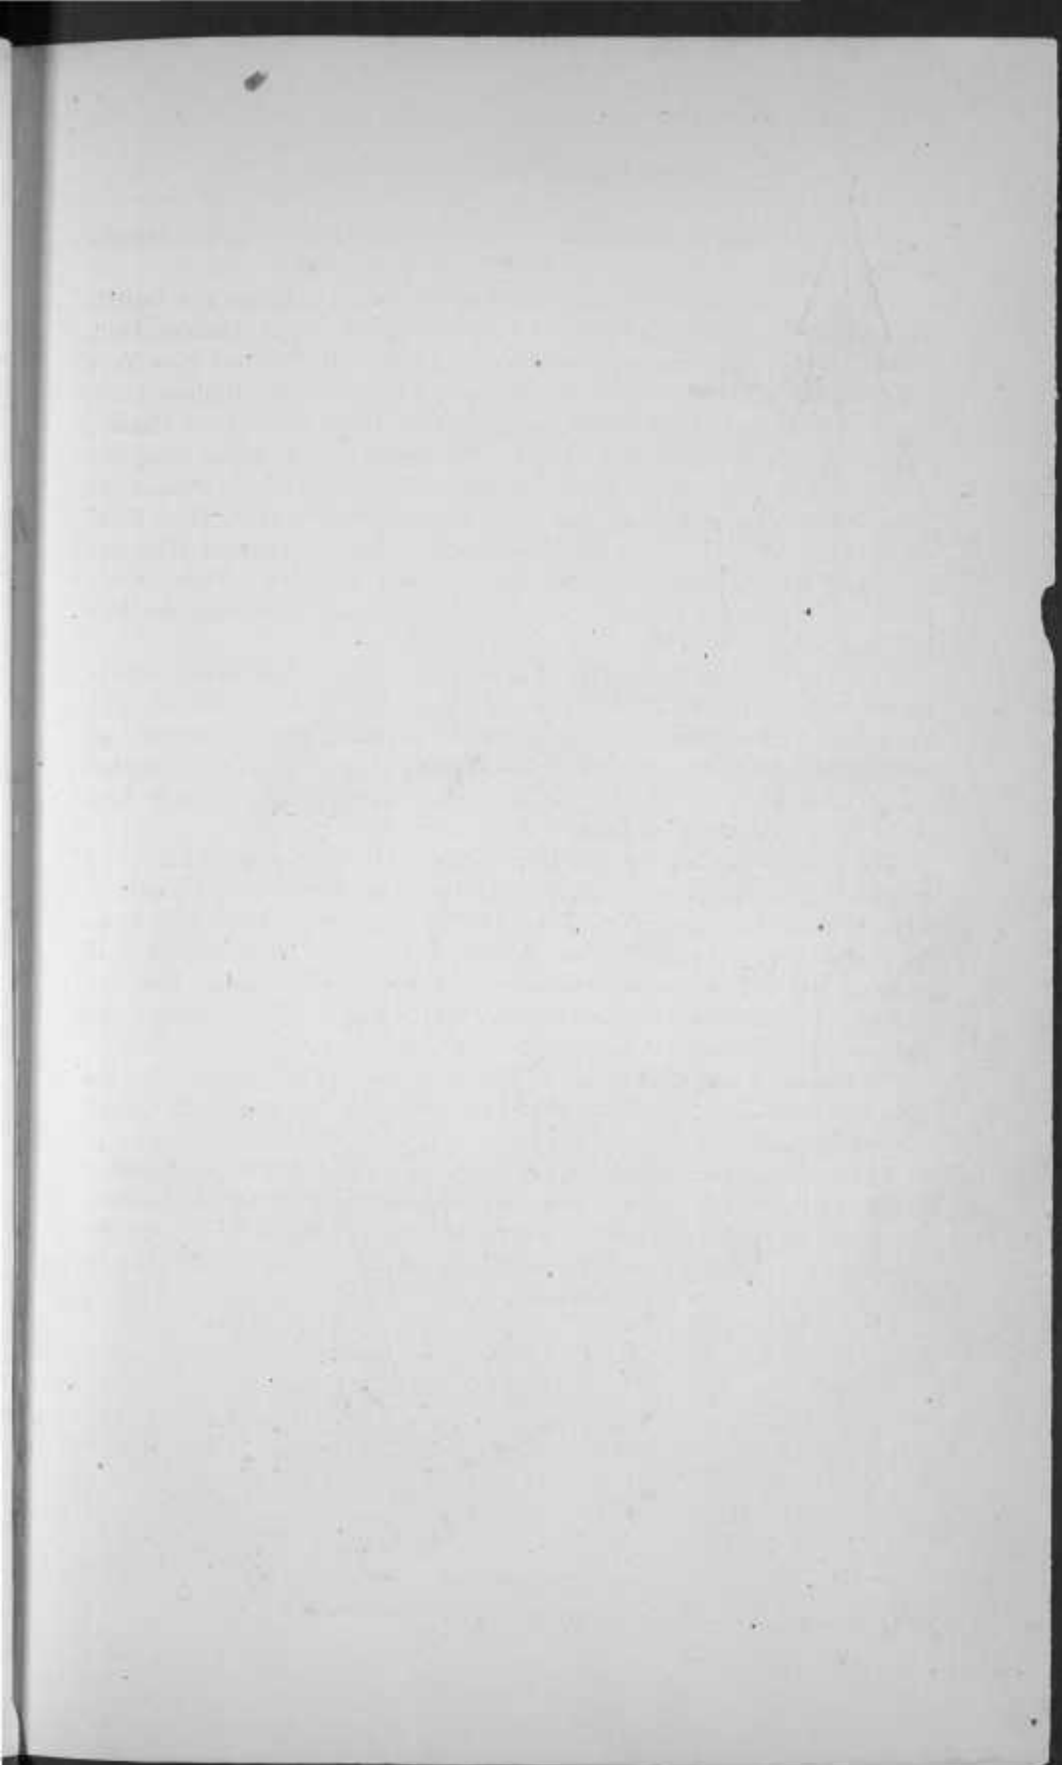

The first railroad terminating in this city was the Attica and Buffalo Railroad, which was opened for travel on the eighth day of January, 1843. In 1854 the following railroads were centered here: Buffalo and New York City; Buffalo and Erie (State Line); New York Central; Buffalo, Lockport and Rochester; Buffalo and Niagara Falls; Great Western of Canada, and Buffalo, Brantford and Goderich. This year the catalogue comprises the Erie, New York Central and Hudson River, Buffalo and Jamestown (connecting with the Atlantic and Great Western), Northern Central, Michigan Central, Buffalo Creek, Buffalo Crosstown, Lake Shore and Michigan Southern, Buffalo, New York and Philadelphia, Allegheny Valley, Great Western of Canada, Grand Trunk of Canada, Canada Southern, and Fort Erie and Niagara.

The International Bridge from Victoria, Canada, to Black Rock, Buffalo, commenced in July, 1870, and opened on the third day of November, 1873, has contributed largely to Buffalo's railroad advantages of communication with the Great West and Canada. The cost of the structure, complete was about \$1,500,000. Its length is nearly three-quarters of a mile from the Canada shore to Black Rock.

The product of the coal and iron mines of Pennsylvania, the iron and copper of the Lake Superior region, and the iron of the Lake Champlain district find a common center of receipt and distribution at Buffalo, hence the magnitude of the establishments engaged here in the production of all kinds of manufactures of which iron and copper are the basis. The blast furnaces, rolling mills, malleable iron works, nail works, foundries and stove works are deemed to be the most perfect in the country.

The location and climate of Buffalo is peculiarly well adapted for the manufacture of malt, and the capacity of its malt-houses at present exceeds 2,000,000 bushels per annum.

There are many other interests of magnitude which might be alluded to if space permitted. Among them, the hide, leather and tanning business is one of the most important, a large amount of capital being invested therein, and, from the superior character of the product, Buffalo sole-leather has a world-wide reputation.

#### HACK ORDINANCE.

The prices which may be charged by the owners or drivers of hackney coaches or other carriages, are as follows:

1. For conveying one passenger any distance not exceeding one mile, 50 cents. For each additional passenger, 25 cents.

2. For conveying every passenger any distance over one mile, and not exceeding two miles, 75 cents.

3. For conveying every passenger over two miles to any point in the city, \$1.

4. For children between eight and twelve years of age, half the above price only; and for children under eight years of age no charge to be made.

5. For the use of a hackney coach or other carriage by the day, for one or more passengers, \$8.

6. For the use of a hackney coach or other carriage by the hour, with one or more passengers, with the privilege of going from place to place, and of stopping as often as may be required, \$1.50.

7. Distances shall be measured by the most direct traveled route; and in all cases where the hiring of a hackney coach or other carriage is not at the time thereof specified to be by the day or hour, it shall be deemed to be by the mile.

8. Each passenger shall be allowed to have carried and conveyed upon such hackney coach or other carriage, one trunk, or other article used in traveling, without charge; but for every trunk or other article, more than one, carried, the owner or driver thereof shall be entitled to demand and receive the sum of 5 cents, if conveyed within the distance of one mile; and if more than one mile, the sum of 10 cents.

§7. The penalty of \$10, for each and every offense, shall be imposed upon the owner or driver of any hackney coach or other carriage, who shall—

1. Refuse or neglect to convey any person or persons, save and except disorderly or drunken persons, to any place within the bounds of the city, upon being applied to for that purpose; or

2. Ask, demand, take or extort any greater prices or rates than those herein established, or charge any additional sum for going from the stands to take up a passenger or passengers, excepting that the distance from the stands shall be considered as part of the distance for which he shall be entitled to the regular fare.

#### LEGAL HOLIDAYS.

Any day appointed or recommended by the Governor of the State or the President of the United States, as a day of fast or thanksgiving, the fourth day of July, the twenty-fifth day of December, commonly called Christmas day, the first day of January, commonly called New Year's day, the twenty-second day of February, and the thirtieth day of May, commonly called Decoration day, and when the said fourth day of July, twenty-fifth day of December, first day of January, twenty-second day of February, or the thirtieth day of May shall occur on Sunday, then the ensuing day thereto shall, for all purposes whatsoever, as regards the presenting for payment or acceptance, and of the protesting and giving notice of the dishonor of bills of exchange, bank checks and promissory notes, be treated and considered as the first day of the week, commonly called Sunday. And any bill of exchange, bank check or promissory note which would fall due and payable on any of the days above mentioned, shall, when said day falls on Sunday, become payable on the Tuesday next succeeding such days.

## AWARDED THE FIRST PREMIUM

at the New York State Fair, in 1862; also the First Premium at the International Industrial Exhibition, Buffalo, in October, 1869 and 1871; and we claim the right of saying that our make of Pianos is superior to any manufactured in this country.

*EXTRACTS FROM THE "ROCHESTER UNION."*

MR. G. W. ELLIS—Dear Sir: I take much pleasure in saying that the Piano you furnished for Grau's Opera Troupe in this city, manufactured by Messrs. Kurtzman & Hinze, is a very fine instrument—indeed as good as I have ever used.

Yours truly,

E. MUSIO,

Musical Director of the Italian Opera.

For which we are Agents, and which we unhesitatingly pronounce the best Heating and Ventilating Apparatus for dwellings, Stores, Churches and Public Buildings in this country. The following is one of the many testimonials in our possession:

Messrs. IRLBACKER & DAVIS,

Gentlemen:—I have the "Union Steam Heater," for which you are agents, in my house, and have used it for two years. I regard it as the most perfect heating apparatus with which I am acquainted. The atmosphere of my house is uniform, soft and pleasant, and it is always comfortable as summer. I regard it as an economical apparatus, as far as its consumption of fuel is concerned, and by its use we avoid the sudden and violent changes that are unavoidable in using any Hot Air Furnace that I have ever used or seen.

# BUFFALO TYPE FOUNDRY

N. LYMAN'S SONS, . . . . . Proprietors.

Nos. 36 and 38 West Seneca Street.

By the completion of our new and powerful machines, we are now enabled to force metal into type (heretofore impossible) that will exceed in durability anything in the shape of Type now made in other places.

In case you need new Type for News or Book Work, we would advise you to give us your orders and you will be convinced, what we affirm, to be a fact.

If you let us know when you intend to renew your paper with type, and give us the size and quantity of type you use, we will hold ourselves ready to meet your wants with promptness.

## ELECTROTYPING.

Printers will find it to their advantage to send their forms to be Electrotyped when large numbers are to be printed from them, thereby saving their type from wear. Also Books and Pamphlets Electrotyped as low as Stereotyping. Cuts, Borders, and in fact anything that needs Electrotyping.

In consequence of the death of Mr. N. LYMAN, former proprietor of the BUFFALO TYPE FOUNDRY, the style and name of this Foundry will be hereafter, *N. LYMAN'S SONS, Type Founders, Buffalo, N. Y.*

In making this change, we must return thanks for the favors shown this Foundry in the past, and hope that your trade will be continued with us, and that you will *give us an opportunity* to please you, as it shall be our endeavor to do so to the best of our ability.

We can supply you with anything in our line at rates as favorable as any Foundry in this country, and material that is *not excelled for beauty and durability.*

Printing Presses and Printing Machinery of all makers furnished at short notice.

Also Type adapted for Dick's Mailing Machines. Printers and Publishers merely giving the number of *slabbers*, can have fonts put up suitable for same.

Wood Type and Wood Printing Materials furnished.

Type from other founders' specimen books can be furnished at short notice.

Respectfully Yours,

N. LYMAN'S SONS.

## TÄGLICHER REPUBLIKANER

(DAILY REPUBLICAN.)

Published and Edited by ISMAR S. ELLISON,

Is the *most progressive and liberal*, and the *only German Republican Newspaper* in the city, recognized as such by the German Republicans. It fights public corruption without fear or favor, wherever it can detect it, and is therefore most heartily hated by the public thieves of all classes and all parties.

It courageously fights fanaticism and bigotry wherever they may exist, and stands up for free, *non-sectarian schools*, *compulsory education*, *taxation of church property* without any exception whatever, and a constitutional enforcement of an absolute emancipation of state affairs from the control or influence of any religious sect or denomination whatever, which is recognized as the living issue of the Second Century of American Independence.

On account of its honest principles, its thorough and courageous manner of dealing with the questions of the day, it is more eagerly read than any other German Newspaper in the city, it is the family paper of the best and most influential class of Germans, and although the youngest among its contemporaries already equals them in the number of subscribers, and is sure to surpass them in a short time.

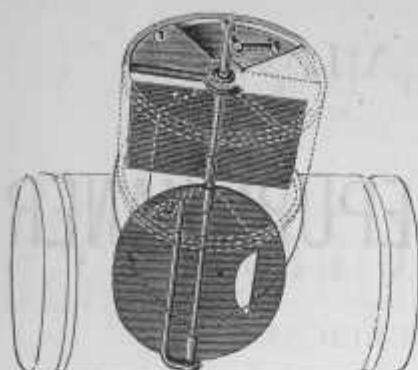

*As an Advertising Medium it is therefore unexcelled.*

## BOOTE'S AUTOMATIC DAMPER AND VENTILATOR

For Stoves and Furnaces.

Health, Money and Comfort Insured.

Gives uniformity of Temperature, with every change of the weather, saving care and time in the management of Stoves and Furnaces.

It is a wonderful saver of fuel, Coal, Wood or Coke.

Insures all danger against fire from an overheated Stove

or Furnace. It is a certain remedy against explosion of gas in Stoves or Furnaces.

It certainly prevents clinkers (when Coal is at least ordinary), thereby causing less lifting of ashes.

It acts as a Ventilator "Automatic" thereby promoting and securing the health of the family.

### A SAMPLE OF OVER TWO HUNDRED TESTIMONIALS.

From Buffalo Commercial Advertiser, Jan. 7, 1876.

A GOOD THING.—With great confidence we ask attention to the claims of the inventors of the "Automatic Damper," which is described in our advertising columns to-day. Upon the strongest authority we can recommend this as being all it claims to be. *It effects a great saving of coal*, adapts itself to the force of the wind, keeps the fire bright, and never admits too powerful a draft. It is easily regulated, and a child can understand its principle. We know whereof we speak when we commend this "Automatic Damper" as an article for which there has been great need and demand, and which fully supplies the want.

RETAIL PRICE FROM \$2.50 to \$5.00.

For Sale by sensible Stove and Furnace dealers. For particulars, pamphlets, &c. Address

**LATEST IMPROVEMENT.**  
Double Treadle, including one shut-saw, thirty immitable First Sawing Patterns and prepared Wood, to the value of \$4. A new device for tightening Saw, Power Drilling attachment, Wrench, Oil Cup and Screw Driver. Speed, 80 strokes per minute. Saws, 12-inch thick. Price, complete, case and delivered on board car or at Liverpool office, \$25.  
Saw only, without attachments, \$9.

**SMALL STEAM ENGINES.**

With Copper Boiler, to drive Light Lathes, Scroll Saws, etc. Are all sizes from 1/2 up to 1 horse power; either plain castings, partly finished, or complete, ready for use.

The "Scientific American" of June 19, 1885, says of the above, in an extended Editorial, introducing our manufactures to the public: "It can turn wringers, churns, washing machines, or ice cream freezers, run coffee mills, pump water through a house, actuate foot lathes, scroll saws or light-hewing machinery, run knitting or sewing machines, turn a grindstone or emery wheel, work ventilating or hand-tightening machine rollers, meat or feed choppers, or sausage machines, drive small blowers for pneumatic dispatch tubes in a building, or for a blacksmith's forge, or compress air or work an air pump on a small scale in a laboratory. These are a few only of the purposes to which it can be applied."

Also Engines and Boilers capable of propelling boats from 15 to 25 inches. The boats have keel, stem, with rudder and tiller, row locks and oars. These wishing a pleasure boat will find

ling boats from 15 to 25 feet long, 3 1/2 to 5 1/2 feet beam, with draft of water stern and rudder post of oak, pine plank, copper sheathed throughout, fitted seats all around the boat, lockers and coal bunkers, and have two coats of paint, these the safest and fastest, as they can be made to attain a speed of from 6 to 16 miles per hour. They are adapted to a great variety of uses, such as Excursion, Shooting, Fishing or Pic-Nic Parties, for travelers, foragers, botanists and tourists, and especially owing to their light draft of

water for exploring expeditions and surveying parties. The Engine and Boiler can be easily detached from the boat, and is then available for Agricultural, Mechanical, Commercial or Domestic requirements, or for the use of Amateurs, when power is needed for running light machinery.

Price of a foot boat, complete,

Price of Engine and Boiler, without boat, including driving pulley,

NOTICE TO THE TRADE  
 CONCERNING  
 THE COURIER COMPANY'S  
 BUFF-TINTED COPYING PAPER.

CHEAPEST AND BEST PAPER MANUFACTURED.

Circulars have been issued to the Stationery Trade, advertising our numerous customers as "unprincipled jobbers and dealers," and threatening them with prosecution, which are doubtless intended to intimidate them against purchasing or using

THE COURIER COMPANY'S  
 BUFF-TINTED COPYING PAPER.

and have gone so far as to state that in some instances our Paper has been represented to be another article, made by other parties.

We have bestowed years of labor in bringing our Paper to its present perfection, and so far from having any desire to confound it with any other, have labored assiduously to preserve its identity with us.

It is our intention not to permit the trade to be intimidated in the purchase of our Paper. We are able to supply the market with a superior article, at less price than any other, and propose to do so.

If you buy any Copying Paper or Books made by us, we shall protect you against any loss by reason of prosecution or infringement upon the pretended rights of any manufacturers.

Every one of our Copying Books has pasted on the front inside cover a label, reading "THE COURIER COMPANY'S BUFF-TINTED COPYING PAPER." Then follow a few lines setting forth the advantages of our Paper, with directions for copying, &c.

All our books are done up in packages of one-quarter dozen each, with a label on the outside of package which reads, "The Courier Company's Buff-Tinted Copying Paper, Copying Books," size, number and thickness.

Our Buff-Tinted Copying Paper is done up in packages of two reams each, with label on the outside of each package as follows: "The Courier Company's Buff-Tinted Copying Paper." This label also contains a list of all the sizes of Paper we manufacture, with other instructions in regard to using this paper, &c.

We have been somewhat particular in describing the manner in which our Paper and Copying Books are sent out to the trade, so that they may more readily identify them, and understand that we do not wish to confound them with any inferior article.

THE COURIER COMPANY, MANUFACTURERS,  
 BUFFALO, N. Y.

## REDUCED AND REVISED PRICE LIST

OF

THE COURIER COMPANY'S  
WHITE AND TINTED COPYING BOOKS AND PAPER

Our books are now acknowledged to be manufactured from the best paper in existence; to be the strongest bound; will take the clearest impression, and guaranteed not to shrink or part at the back. We are the sole manufacturers of this paper, and now offer both books and paper to the Trade at lower prices than Manila Tissues and imitation papers, from which most of the Copying Books are now made.

Branch offices in all the Principal Cities of the United States and Canada; in London,  
England; also a Continental Correspondence.

---

This Agency is most thorough in its organization. It was the first to present to the mercantile world reports epitomized and in book form, so that subscribers to it may have immediately accessible the digest of the various elaborated commercial reports, giving them, as it were, a compendium agency of their own in their counting rooms. This method at once popularized this agency and gave to it the name, standing and patronage which it now enjoys. Each of the volumes contains between 600,000 and 700,000 names, with their quotations of worth and credit, obtained from the full histories on file in the Agency, and which are furnished on application to all subscribers desiring the fullest particulars.

These histories are carefully compiled by a corps of competent reporters, who periodically travel throughout the country, and also by local agents, who also send us currently changes as they transpire, which are published weekly for the benefit of subscribers.

No business can afford to discard the use of a system so perfectly organized for its good, and that this is the general testimony is evinced by the continued patronage accorded it by so many thousands of business houses throughout this country and Europe.

We respectfully announce that

A Revised Edition of our Reference Book,  
Containing the

Names, Business, Worth, and Credit Standing of  
700,000 TRADERS,

IS ISSUED ON THE

FIRST DAY OF JANUARY, MARCH, JULY AND SEPTEMBER.

THE MERCANTILE AGENCY has been in successful operation  
for about Thirty-five years, and was

The First Organization of the kind estab-  
lished in America for the Promotion and  
Protection of Trade.

The yearly extension of its operations, the ever-increasing  
patronage it attracts and retains, are evidences of its efficiency  
and success. It has stood the test of time and overcome many  
difficulties and prejudices, and at no period since its origin has it  
exercised such important functions in commercial affairs as now.  
There are

## SEVENTY-ONE BRANCH OFFICES,

under one general management, and co-operating for a common end. Each has a well appointed management and a certain district assigned, which is periodically revised by its own travelers. It is in this manner that we are enabled to report thoroughly and exhaustively the ENTIRE UNITED STATES and BRITISH NORTH AMERICA, our Agents accepting only that information which has been endorsed by well-posted authorities, and the points in which referring to REAL ESTATE, MORTGAGES, JUDGMENTS, &c., have been obtained from official sources. We are also promptly informed of all changes by our numerous resident correspondents. The rapid growth of our business and the magnitude of our organization stamp us as pre-eminently THE AGENCY. It is the only one which, by its

### LEGITIMATE RESOURCES AND HIGH POSITION,

commends itself to the full confidence and patronage of the public. We leave no effort unspent to do justice to the Wholesale Trader, Banker and Manufacturer, who seeks our information, by thorough, efficient and unprejudiced reports of those with whom they transact business.

# BUFFALO CITY DIRECTORY

FOR THE YEAR 1876.

## ABBREVIATIONS.

In the pages following, *h.* stands for house; *b.* for boards; *w.* for with; *ave.* for avenue; *cor.* for corner; *opp.* for opposite; *wid.* for widow; *lab.* for laborer; *ab.* for above; *bel.* for below; *bet.* for between; *n.* for near; *r.* for rear; *carp.* for carpenter; *N. S. E. W.* for north, south, east, and west; *N. Div.* for North Division; *S. Div.* for South Division; *Exch.* for Exchange; *Wash.* for Washington; *Com'l* for Commercial; and the abbreviations of the States for streets of similar names. The word *street* is implied.

It will be noticed that the names and residences of all members of a firm are in a smaller type, directly under the name of the firm. This, it will be understood, does not interfere with the regular insertion of the same names in their alphabetical order.

TRADE MARK.

FOR SALE BY ALL DRUGGISTS.

ASK FOR HICKEY'S CORN AND BUNION PLASTER, AND TAKE NO OTHER. This Plaster is Warranted to cure Corns and Bunions, and all soreness arising therefrom, in a few hours, if applied according to directions. PRICE, 25 CENTS. Sent by Mail to any part of the U. S. on receipt of 20 cts.

**NOTICE.**—This (HICKEY'S) Plaster is an entirely distinct Plaster, and is put up different from all other so-called Corn Remedies, such as Caustic, Acetic Acid, Potash, Nitric Acid, or the many articles which are offered to the suffering public and which do more injury to the feet than good, on the pretense that they will cure corns, or the so-called felt plaster, which only relieves the corns for a short time, or prevents the shoe from pressing on the corns.

PREPARED ONLY BY

JOHN L. HICKEY, Manufacturing Chemist,

(Proprietor of Hickey's Cough Syrup for the Lungs), to whom all orders should be addressed.

In the long list of inducements offered by Life Insurance Companies, there are two plans which recommend the LIFE ASSOCIATION OF AMERICA above all others. The first is the

## ADVANCE DIVIDEND PLAN.

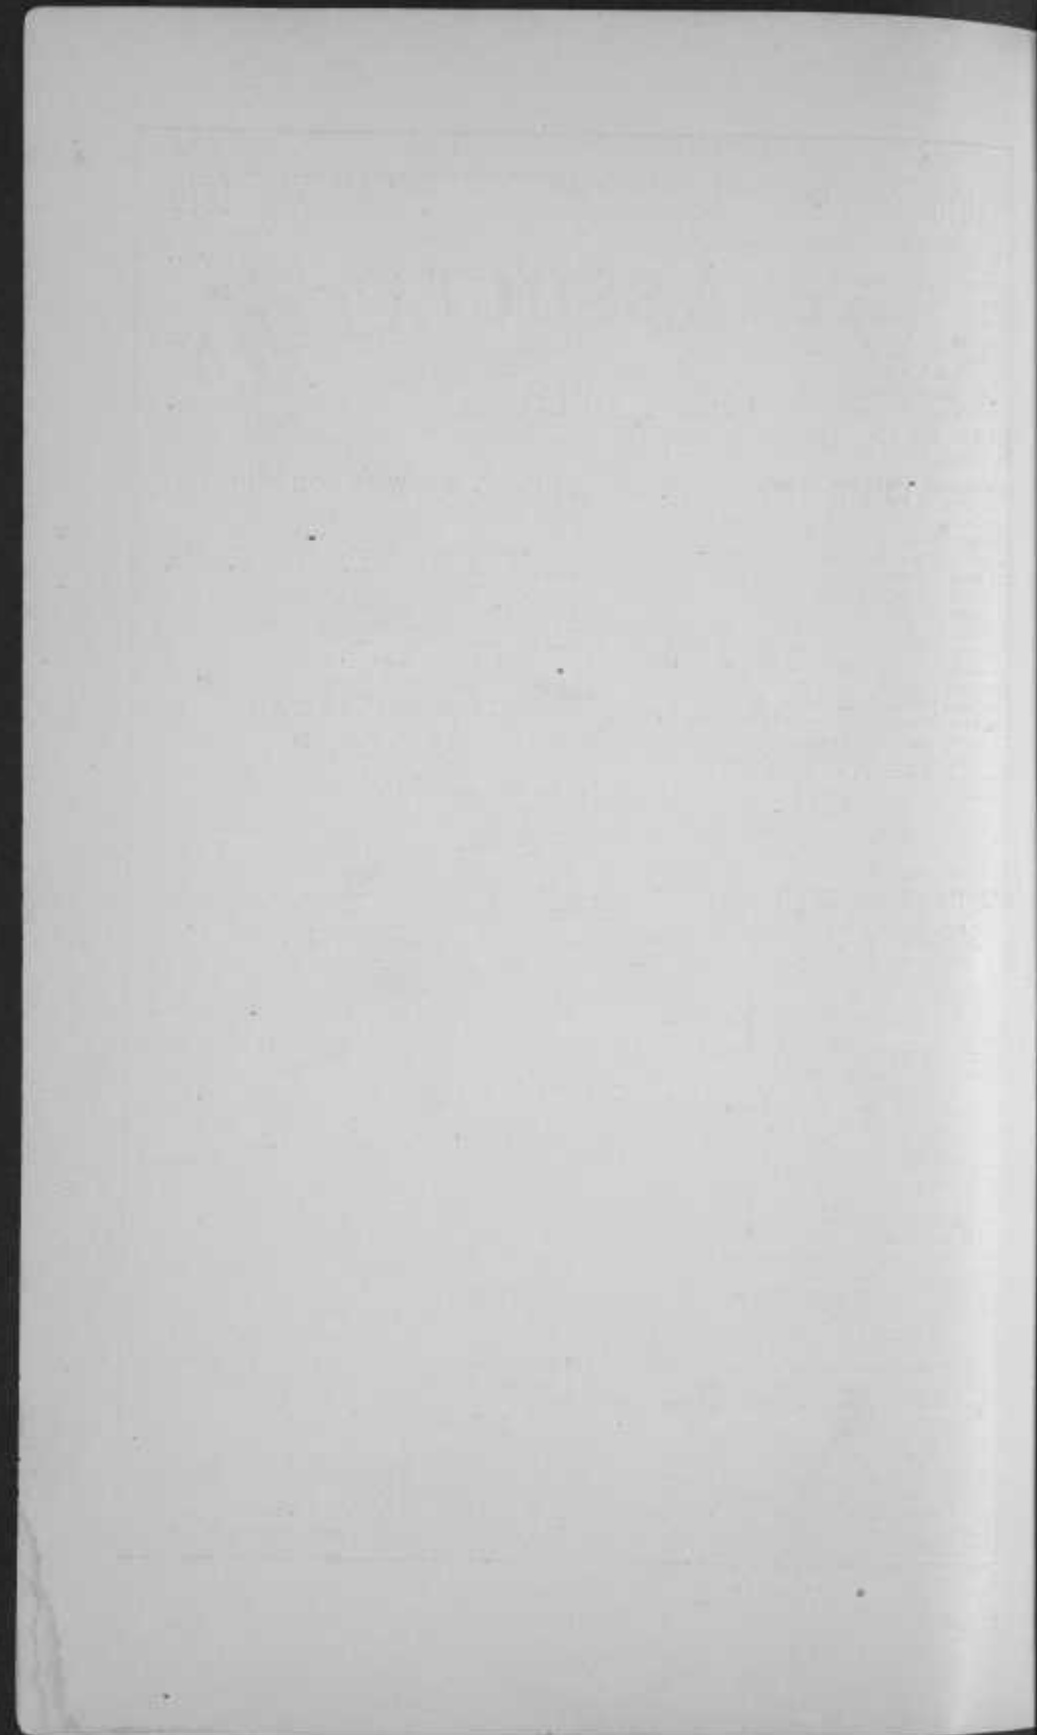

This is original with this Company, and is offered by no other. It gives on all life and endowment policies at their issue a fixed and certain dividend in advance, in the form of additional insurance of twenty-five per cent. of the amount insured under the policy, viz.: a \$1,000 policy stands \$1,250; \$4,000 policy \$5,000; \$8,000 policy \$10,000, making a virtual reduction of premium at once. It is expected that the surplus arising from the payment of the full premiums for ten years will prove sufficient to secure the additional insurance of twenty-five per cent. for the full term of the policy, leaving dividends to reduce the yearly premiums thereafter.

The second feature is that of

## Continued Full Insurance under Lapsed Policies (except Term Policies),

Which is particularly beneficial to policy-holders. When a policy lapses by non-payment of premium—two years' premium having been paid—if a paid-up policy be not applied for so as to take effect on the day when the premium is due, then, in lieu of such paid-up policy, the insurance will continue in force under the original policy for the full amount insured, as long as the value will carry the risk. Thus, under this system, a Ten Payment Life Policy for \$10,000, on a life aged 40 at date of issue, two years' premiums having been paid, would continue in force for the full \$10,000 for five years and two hundred and seventy days after the cessation of payment of premiums. If the insured die during the period of the extension of the policy, the full amount of the insurance will be paid without any deduction for premium or interest. This is the Massachusetts law improved.

# JEROME PIERCE & CO.,

MANUFACTURERS OF

## SHINGLE, HEADING, STAVE AND SAW MILL MACHINERY.

Patented April 17th, 1868.

### OUR AUTOMATIC TWO-BLOCK MILL.

This is a machine which we unhesitatingly present to the public as the Best Two-Block Mill in use. It is constructed entirely of iron and steel, and in a simple and durable manner. The advantages of this machine are: the LARGE QUANTITY OF WORK turned out, its QUALITY, and the SAVING OF LABOR,—one man tending it easily. The machine is so constructed that when one block is being sawed the other is receding, *ELEVATED ABOVE THE SAW*, which is done by the tracks upon which the carriage runs being raised and lowered by a simple arrangement not liable to get out of order.

The advantages are, that the saw will run *LOWER* WITHOUT RESETTING, as the saw comes in contact with the block only when cutting. The block not coming in contact when receding, the upper side of the saw is dulled no faster than the lower, a desideratum not accomplished in any other machine. Any one will readily see that the saw will run much longer before refiling, and also avoid making clipped shingles as in other machines, where one side of the saw becomes duller than the other. It has the advantage of other two-block mills in using 40 inch saws instead of 36, and the carriage consequently requiring less distance to travel to cut the same width shingle.

It has the self-acting tilting table operated by the movement of the carriage, and by raising the post, you make as many shingles as you please one way, if desired.

**Awarded the Silver Medal at the Ohio State Fair, Toledo, 1868. Awarded the Silver Medal at the Michigan State Fair, Detroit, 1868. Awarded the Highest Premium at International Industrial Exhibition, Buffalo, N. Y., 1869 and 1871.**

We also manufacture Automatic One Block Shingle Machines, Hand Feed Single Block Shingle Machines, Wheel Jointers, Saw Jointers, Bolting Machines, Drag Saws, Wood Splitters, Wood Saw Tables, and Saw Mill Machinery, with the latest improvements.

*Conduct an Agency*

FOR THE RECEPTION OF ADVERTISEMENTS FOR

## AMERICAN NEWSPAPERS

*The most Complete Establishment of the kind in the World.*

8,000 NEWSPAPERS ARE KEPT REGULARLY ON FILE,

OPEN TO THE INSPECTION BY CUSTOMERS.

Every Advertisement is taken at the Home Price of the Paper.

WITHOUT ANY ADDITIONAL CHARGE OR COMMISSION.

*An advertiser in dealing with the Agency, is saved trouble and correspondence, making one contract instead of a dozen, a hundred or a thousand. A BOOK of eighty pages, containing lists of best papers, largest circulations, religious, agricultural, class, political, daily and country papers, and all publications which are specially valuable to advertisers, with some information about prices,*

IS SENT FREE TO ANY ADDRESS ON APPLICATION.

*Persons at a distance wishing to make contracts for advertising in any town, city, county, state or territory of the United States, or any portion of the Dominion of Canada, may send a concise statement of what they want, together with a copy of the ADVERTISEMENT they desire inserted, and will receive information by return mail which will enable them to decide whether to increase or reduce the order.*

FOR SUCH INFORMATION THERE IS NO CHARGE.

Orders are taken for a single paper as well as for a list,

For a single dollar as readily as for a larger sum.

THE Publisher of the Buffalo Directory does not deem it necessary to offer to the publick, any apology for attempting to comply with the frequent calls, (particularly from strangers,) for a work of this kind. But he regrets that unforeseen circumstances have prevented his bestowing that labour and attention upon it, which the work really required. He also regrets the delay that has attended its publication. The subject was new to him ; and he unexpectedly found himself engaged in a work that demanded a longer period for its proper completion, than he had originally assigned for it. He is aware of its imperfections, but he hopes to secure the indulgence of his friends for the first attempt in a perplexing business; by a promise of increased exertions, should the success of his present undertaking warrant its future continuance.

Buffalo, February, 1828.

## INTRODUCTION.

---

THE Village of BUFFALO is situated in the town of the same name, in the county of Erie, and state of New-York; and is built upon the land adjoining Buffalo Creek and Lake Erie, at the junction of these waters. Most of the village is situated upon a bluff of table land that rises about fifty feet above the level of the Lake. The low lands that extend from the foot of this bluff, (or Terrace, as it is generally called, which forms the western and southern boundary of the upper village,) to the margin of the Creek and Lake, offering many inducements to particular business pursuits, have been overspread with buildings, and are becoming thickly populated.

The village was originally surveyed and laid out, by the Holland Land Company, to whom the site belonged, in 1801; and the settlement may be said to have begun in the following year. The streets were originally graced with such trans-atlantick names, as were calculated to preserve the associations of home, in the minds of those who owned the lands; but these have recently, by our village authorities, been displaced, and those shown in the annexed map, substituted. Owing to the usual causes which retard new settlements in their advancement, the village made but inconsiderable progress in

its growth, until the commencement of the war, in 1812, when it became a military resort. In December, 1813, the place was entered by the British and Indians, and every building but two was burnt.—The inhabitants were many of them carried captives to Montreal, while others preserved their liberty by a precipitate flight. The loss of property fell mostly upon individuals, and was not only severe, but, in its consequences, truly calamitous—leaving in many instances, families destitute of house, clothing or provisions, with which to combat the severities of the season. From this period to the close of the war, nothing like a regular and permanent attempt was made to rebuild the town, although such of the inhabitants as could, returned and made temporary locations upon the sites of their former habitations. The news of peace was the signal for renewed exertions to rebuild the place, but pecuniary embarrassments, and remoteness from market, paralyzed all efforts so effectually as to keep back the place, and retain for it the character of a hamlet only, until the near approach of the Grand Canal, in its progress westward, in 1822, gave brighter prospects to those on whom exertions devolved. In 1825, payment was received from the United States, under certain restrictions for the buildings destroyed in 1813, but all remuneration for other property lost, was rigidly withheld.—Exertions for publick advancement now became more visibly efficient; and the attempts which had been several years making to render Buffalo Creek a commercial resort, were now first completely successful. The mouth of that stream had been obstructed by a sand bar which shut out most vessels that navigated the lake, and forced them to resort to

Black Rock, where a temporary shelter only could be afforded them, in the open river. To effect the desired object, a loan had been procured from the state, of \$12,000, which, aided by private donations, had so far perfected a pier on the south side of the mouth of the Creek, as to exclude sand, and leave an open channel for vessels into the mouth of the harbour. The consequences of this were to create a new resort for vessels, and to arrest them in their passage to Black Rock. This necessarily caused the preparation of wharves, store-houses, and such other conveniences as were required by the new business pursuits thus created. In January, 1825, the first village census was taken, and gave a total of 2412 inhabitants; being 314 more than the whole township of Buffalo contained five years before.

#### GENERAL VIEW, &c.

From the period last mentioned to the present, the growth of the village has been regular, and its improvements permanent.

The village of Buffalo was incorporated in 1822, by its present name, and its municipal government is administered by a President, and Board of Trustees, who are elected annually, by the free inhabitants.

*The Publick Buildings*, consist of five houses of publick worship, court-house, jail, bank, ensurance office, land office, market, engine house, and light-house.

*Publick Institutions*.—These are, the Bank of Niagara, incorporated in 1816, with a capital of \$400,000, the charter of which expires in 1832.

Western Ensurance Company of the Village of Buffalo, incorporated in 1817, capital \$400,000—

\$365,750 of which is paid in—charter expires in 1830.

Buffalo High School, incorporated in 1827, capital not to exceed \$25,000—\$10,000 of which is already subscribed, and the school commenced in in rooms temporarily fitted for the purpose, in January last. The buildings for this institution, are to be erected the ensuing season.

The Buffalo Hydraulic Association, incorporated in 1827, capital \$25,000, which may be increased to \$50,000. The objects of this association are, to supply the inhabitants with water, and to create MILL PRIVILEGES, within the village. This latter object is to be accomplished by taking out the waters of Buffalo Creek, about three and a half miles from the village, and conveying them by a canal to the eastern boundary of the corporation, about half a mile from Main-street, where sufficient fall can be had for the purposes intended. This canal was begun last summer, and so far completed as to demonstrate the feasibility of the scheme. A Saw-Mill is already in operation upon the canal, and no doubt seems to remain that when the work is completed, an abundant supply of water will be obtained, and mill privileges of incalculable advantage to the village and country, be thus placed at command.

*Religious Societies.*—These are, one Episcopal, one Presbyterian, one Universalist, one Baptist, and one Methodist.

*Schools.*—There are within the village, 11 District and Private Schools, exclusive of the High School above mentioned, and embracing two Schools for Young Ladies, conducted on the most approved plan, by competent teachers, in which the higher branches

of female education are taught. There may be added to these, a School recently established by the Mariners of the Western Lakes, for the purpose of improvement in navigation, which is designed as a permanent winter establishment.

*Mails.*—The whole number of Mails arriving at and departing, weekly, from the Post-Office in this village, is 35. The first mail received here was in March, 1803, on horseback. It was conveyed from the east once in two weeks in this manner, until 1805. A weekly route was then established, and continued until 1809. In 1810, the mode of conveyance was changed, and a stage wagon was used. As the country advanced in improvements, the route was changed to twice and three times a week, and subsequently to a daily route. The Eastern mail is now received regularly twice a day.

The following is a list of the Mails, arriving at and departing from the Post-Office in this village, in each week:—Eastern Mail, twice a day; Western, daily; Northern, do.; Mail, via Springville, to Olean, once a week, (during the summer twice); via Warsaw to Geneseo, twice a week, (summer three times); via Lodi, to Fredonia, once a week, (summer twice); via Cayuga Creek, to Moscow, once a week. During the season of navigation, the Steam-Boat Mail to Detroit, is dispatched four times a week.

*Newspapers, &c.*—There are published in this village, five Newspapers, viz: Buffalo Journal, Buffalo Patriot, Buffalo Emporium, Buffalo & Black Rock Gazette, and Western Advertiser. The Emporium is published semi-weekly, the others weekly. The Patriot and Journal are the oldest establishments, the former having been commenced in 1811, under the

name of the Buffalo Gazette, and the latter in 1815, under that of the Niagara Journal. The Emporium was commenced in 1824; the Buffalo and Black Rock Gazette was removed from Black Rock to this village, in November last, at which time the word Buffalo was first added to its title; the Advertiser was commenced in December last. The Journal and the Emporium, are owned and conducted in connection with Book Printing, Book Binding and Book Selling operations, which are pursued to an extent, in the various branches, commensurate with the existing demand.

*Publick Works.*—Of these, we enumerate the termination of the Erie Canal, and its dependencies; the Pier built to protect the entrance of the harbour from encroachments of sand, upon which the United States have bestowed an appropriation of \$15,000; and the Light-House now built, with the one to be erected the ensuing season, the foundation of which is already laid. To these must be added the works of the Hydraulic Association, before mentioned, for the creation of water power for mill and other purposes.

There is a Company formed, for the purpose of supplying the villages of Buffalo and Black Rock with water to be drawn from the Jubilee Springs, two miles and a half east of the village, where an abundant supply is found of excellent quality, for culinary and other uses. This water has already been introduced into Black Rock, by wooden pipes, and it is understood that measures will be taken to bring it into Buffalo, at as early a period as practicable.

The Erie Canal approaches the village across the low lands which form the shore of the Niagara river

at its head, and terminates in the Little Buffalo Creek, a few rods from the foot of the Terrace. From the point of intersection with the Little Buffalo, to where that stream is lost in Big Buffalo Creek, extensive excavations have been made, which render the whole distance a continued basin, and the same is true of a considerable distance above the point of intersection; making in all one of the most extensive and convenient resorts for boats to be found upon the Canal. From this basin, boats pass when necessary into the harbour, and assume their stations either by the side of lake vessels, or at the wharves of store-houses, as convenience of discharging and receiving cargoes may require.

Buffalo Harbour, with which the Canal thus communicates, is formed by Buffalo Creek, which is of sufficient depth to receive the lake vessels for a distance of about one mile from its mouth, and is considered by mariners as affording the most secure and convenient harbour to be found on the American shore of the lake. The present Light-house is situated on the shore of the lake, upon a tongue of land formed by the shore of the lake and Buffalo creek; but its light is so diminutive that government have resolved to abandon it, and one is now erecting on the outer extremity of the Buffalo Pier, the base of which will connect with and serve to prolong that work.

#### STATISTICKS.

The number of American Vessels of various descriptions, employed in the commerce of Lake Erie and the upper Lakes, is 53, with an aggregate burden of 3611 tons. The relative increase of lake commerce at Buffalo, will be best illustrated by the

subjoined table, showing the number of arrivals and departures in each of the thirteen preceding years:

Years.	No. of arrivals and departures.	Years.	No. of arrivals and departures.
1815	- - 64	1822	- - 200
1816	- - 80	1823	- - 235

1820	- - 120	1827	- - 572
1821	- - 150		

Of the amount of property shipped to the various ports of the Lakes, no certain information can be given, with the exception of the single article of Salt, of which upwards of 30,000 barrels were shipped during the past year.

The following comparative schedule of property, received by, and shipped eastward on the Canal, in 1826 and '27, will give some idea of the importance of that branch of business, to this village:

Collected in 1826, \$19,558. Increase in 1827, \$16,735.

By this schedule, it will be seen, that Pig Iron and Iron Castings, to a very large amount, have been received for eastern destination. These articles are the product and manufacture of Ohio, and will yearly increase with the demand for them, as the quantity of ore is said to be inexhaustible; and the business of quarrying and smelting it, affords a fair compensation. Several Furnaces are already in full operation, two of which are connected with business houses in this village, by which the facilities of vending their products are greatly increased. Eventually, these furnaces are designed to furnish wrought bar iron, of a good quality, in any quantities required by the market.

#### MISCELLANEOUS.

*Medicated Vapour Bath.*—This establishment is under the direction of Dr. H. R. Stagg, and its use has grown into considerable repute amongst medical gentlemen, as a cure for the gout, rheumatism, disorders of the skin, and chronick affections generally.

*Theatre.*—This establishment is usually kept open for several months in the summer and fall of the year, when strangers most throng the village. The companies that have heretofore occupied the house, though not the first in the line of their profession, have usually been respectable.

*County Poor House.*—The Supervisors of Erie county, at their last annual meeting, authorized the building of a County Poor House, and appointed Commissioners to superintend its erection the present year.

*Store-Houses.*—There are 12 Store-Houses for the transaction of the business on the lake and canal.

*Taverns.*—The village is better accommodated

with places of publick entertainment, than almost any other place of its size in the country. There are 15 within the bounds of the corporation, several of which are kept and furnished in a style of superior elegance.

## PRINCIPAL EVENTS

*Of the late War, on the Niagara Frontier, arranged in chronological order.*

- 1812, Oct. 13.—Battle of Queenston. Heights carried by the American troops under General Stephen Van Rensselaer, but the second detachment, consisting of New-York Militia, refusing to cross to the support of their countrymen, the broken British troops rallied in the woods, in the rear of the Heights, and being reinforced by others from Fort George, they attacked and regained possession of the Heights, after a severe conflict, in which their commander, General Brock, was slain.
- Nov. 21.—Cannonade between Forts George & Niagara, which continued the whole day, with hot shot from both forts. The British threw more than two thousand hot shot, and one hundred and eighty shells, into Fort Niagara, by which they killed two men only. The American shot sunk a schooner at the wharf upon the British shore, and set the town of Newark on fire repeatedly, during the day.
- Nov. 27.—Captain King, with a small detachment of troops, crossed the Niagara River, in the night, spiked and rendered useless several pieces of cannon, at two small batteries, below Fort Erie.
- 1813, May 27.—Fort George captured by a detachment of General Dearborn's force, assisted by several light vessels from the American fleet on Lake Ontario.
- July 11.—Attack on Black Rock, in which the British destroyed the barracks, block house, &c. They were repulsed by a detachment of regular troops

- and drafted militia, and a party of volunteers from Buffalo and the surrounding country.
- Aug. 24.—British under sir George Provost, attacked the American pickets at Fort George, but retreated after driving them in.
- Dec. 13.—Newark burnt, and Fort George abandoned, by the American forces, under Gen. M'Clure.
- Dec. 19.—Fort Niagara surprised by the British, who crossed at 5 mile Meadows and reached the Fort, undiscovered. This was followed by the burning of the villages of Youngstown, Lewiston, Manchester, (Niagara Falls,) and the Indian village of Tuscarora, on that and the following days.
- Dec. 30.—Buffalo burnt and entirely destroyed by the British with the exception of two buildings, and the inhabitants forced to flee, many of them on foot, through the surrounding wilderness to distant settlements, amidst the frosts and snows of winter.
- 1814, July 3.—American army, under Gen. Brown, crossed the Niagara from Buffalo, and captured Fort Erie, commanded by Major Burke, and garrisoned by 170 British regulars.
- July 5.—Battle of Chippawa. The British regulars defeated at the point of the bayonet by the American troops.
- July 25.—Battle of the Cataract. British defeated after a sanguinary contest, in which Maj. General Brown and Brigadier General Scott were wounded. Maj. Gen. Riall, of the British army, was taken prisoner.
- August 3.—The enemy, 1500 strong, under the command of Lieut. Colonel Tucker, were repulsed at Scajaquadie's creek, in an attempt upon Buffalo,

by a detachment of 240 riflemen, under the command of Major Morgan.

August 12.—Major Morgan, of the first Rifle Regiment, killed in an affair with the enemy's outposts, near Fort Erie.

August 15.—The British repulsed in a night attack on Fort Erie, with the loss of about 600 killed and prisoners.

September 17.—Sortie on the British lines from Fort Erie, which was completely successful. A few days after the sortie, the British retired from before Fort Erie, and abandoned all the posts on the Niagara river, except Fort George. The American troops soon after destroyed Fort Erie, and retired into winter quarters.
